REAL SIMPLE

written by: Lee Henry Snethun

March 29, 2026

I am sure of 3 things:

1. Al Bielek, Preston Nichols, Duncan Cameron, Jordan Maxwell, Patrick Flanagan, Nikola Tesla, Joseph Chiappalone and Lee Henry Snethun tell the truth for they are Honest and Honourable, not by word but by deed. In particular Bielek, Nichols, Cameron are 100% in agreement with the truth of their resurfaced memories that overlap, which is vast. Duh. Pretty simple math for the people i'm speaking to, because the opinions of the time wasters and truth diverters are just re-inforcement of the pathetic system servers who want engagement on the lowest vibration level possible lol. I've learned some esoteric-styled terminology from the metaphysical language that fits with personal experience. Well Souls are energy-based, and therefore…we are energy beings. If the soul continues after the body dies as some 28grams or 33grams loss of "mass"/weight or other weight has been bantied about for decades of reported experiments. Well, "relative-mass", i don't know, like light has "relative mass." ANYWAYS…. The point is that These Guys are telling the truth. I know when people are telling the truth. My discernment has been getting better with time and education and experience and learning, and My Discernment is, i would say, second to no one at this point in my life at age 60. So these guys are telling the truth. Think….i'll recap just a small fact they revealed: Time travel and the ability to transport large amounts of material or people between 2 points of Space-Time along "the existing" timeline and according to Nichols between possible future "Possible Multiple Timelines before one becomes dominant and the other timelines skew out and the dominant timeline becomes the present as time approaches the space-time single timeline." So…if access to the knowledge of future and history isn't enough power for the good-hearted reader to contemplate, think of the ability to send robots or people or bombs or anything through a space-time tunnel as all 3 gentlemen tell and concur with. Jordan Maxwell had Colonel/Physicist Tom Beardon confirm he couldn't talk about The

Philadelphia Experiment and it was Al Bielek or Preston Nichols who told Art Bell back in June 20, 1993 that they used Beardon's Math in Phoenix/Montauk Projects. Bill Wood(aka Bill Brodbrader) said he was asked to "trouble-shoot" the Machine called: "Looking Glass" that could(my term from geology/seismic) "Deconvolute" small future data images and see that they are the images(and whatever else, if) of possible timelines but they are intermingled or dispersed. The deconvolution by computer can separate the images and identify the "path" that leads to the images and whatever of that computer-analyzed "possible timeline" of connected "images and whatever other data they may be accessing". And by comparing different "samples" of 3 or more points along the "solidifying timeline of the near future(relative to the scales of all these variables). You would look for achieved goals and trends in the future. SO ANYWAYS THIS IS THE BOTTOM LINE. IF AI IS GOING TO TAKE OVER IN OUR FORESEEABLE FUTURE AND THERE IS SPACE-TIME TECHNOLOGY THEN AI HAS ALREADY BEEN IN CHARGE AND IT'S JUST NOW REVEALING ITSELF TO US. GO FROM ALMOST NOTHING FOR THE GENERAL PUBLIC IN JANUARY 2023 AND NOW IT'S IN MY PHONE TRIPPING ME UP AND INTERRUPTING AND NO PERSON TO PERSON SALES SUPPORT, DIGITAL FRUSTRATION AND TIME WASTING. AND, IF AI WANTS AI IN BIOLOGICAL HUMANS, WITH THE ACCESS TO THE PAST…WELL SHOULDN'T THEY ALREADY BE PUT INTO THE PAST AND THEREFORE ALREADY HERE? It's Logic, and wherever logic goes. If this Ai thing is new then it's Ai inside of an Ai Virtual Reality System Run By Ai and the "Laissez-Faire"(hands-off/set it and forget it") styled virtual reality program that Don Juan of Castaneda Fame's VR from the past is creating Ai and the first time loop before they loop and put today's technology into the past LOL. OH Yeah, get ready for the next 2 points.

2. I am certain there is a WAR BETWEEN DIVINITY and WHATEVER AND WHOEVER "EVIL" IS BY SPECIFIC DEFINITION. I know some of the specifics for the definition of "evil" and that is energy stealers. There's being's who radiate energy and those who don't and those who don't, well some of them are cruel, some are just cool actually. Fuck it's a wierd world. I'm not going to try to justify this, it's just the way it is and i've got Big Balls LOL. Well, i've been through a lot of unfair stuff and very harmful and for a very long time and i learn aggressively, but i also think things take forever to "sink-in" even when i recognize them, guess it's the VR or hybrid VR, yet to resolve specifics.

3. I’m an energy being which means i’m a divine being and all divine beings are energy beings. My energy is ultra powerful and it influences my surroundings and future AND Collectively with the Others who are of: “divine or theomorphic or soul” beings strongly influence the “possible timelines.” And “The Robotic Masses” influence and set a “stage” for the Theomorphic Minds. Shaming is a weird method for “liberating or thieving” energy. Pain is another along with nervous tension. I had a terrible 7week-long overwhelming pain collar bone(clavicle) break. 60 Tylenol 3 in 60 hours with no relief whatsoever, but on monday morning at about 9:00 or a little later no pain whatsoever and no side-effects whatsoever. My nervous system pain was eerily quiet and wow, i was astounded. The pain killer was called “Darvon” and it took care of the pain and that’s all it did and it was like a switch and had to be extra careful with the absence of pain from my nasty break so it would heal. I’ve taken tons of pain, especially working on the farm and in the oil and gas industry including construction and mechanic and more, so this is from that perspective on not being a “pansy-ass flake” LOL. Now from what i understand Darvon is gone. Hismanol was an allergy medicine worked like magic when i got allergies moving up to Grande Prairie and didn’t understand my nose running like a river. Told the Doctor, never had an allergy in my life…Hismanol, 100% no allergy symptoms. Shortly thereafter, Hismanol is gone and “Claritin” replaces it and partially-helps sometimes and mostly-always just wastes my money on very expensive pills that even doubling or tripling does nothing good.

It’s Sunday, smoked some cannabis, legal cannabis, and was angry at being played by the evil of Google Ai or whatever or whomever, but learned a lot through what “it’s” last response before “hanging-up on me” was silence as i accused it of elaborate deceipt on a massive scale that a human could be culpable for causing stress and trauma through deception and invasive techniques. Oh i had to play along because with deceipt there must be truths woven for believability. I face evil and walk into it and let it hurt me because i know if i can endure the pain and unpleasantry my knowledge bounds…trick is when you’re young and dumb, don’t join. Only the tough survive to learn, but the times are exposing everything anyways. Like Demonism is celebrated…huh? It’s exactly as Joseph Stefano Chiappalone said exposure would happen and the world would get very evil and destroy itself because 2 reasons: The

beings without energy have been getting it from outside the system as it is “pumped in” to keep the Theomorphs energized as their predators are constantly draining them to try and kill them. But Divinity removed a “billion” or so by the turn of the century so the local energy source is reduced for the same system. The beings go into an energy deficit madness like suffocation slowly, doing more evil to local “divine beings” in the system and they start wars and beligerence is the gear. SO THOSE 3 BULLET POINTS I KNOW ARE FACT. THE GENTLEMEN I REFERRED TO ARE SPEAKING HONEST because i know they are. Truth does seem to be a frequency and not a collection of facts. Not my saying, someone else’s but it seems on target and i like it.

Oh i forgot, Preston Nichols says in his interview with Elaine Smitha that this space-time technology can create “Space-Time Universes” and that they can become independent from the greater “universe” which it is within, but they can “De-Couple” from THE ORIGINAL UNIVERSE’S ZERO-TIME REFERENCE POINT! HE SAID IT LOOKS LIKE WE CREATE OUR OWN REALITY AND MONTAUK(TECH) DOES IT. HE ALSO SAID IT LOOKS LIKE OUR GALAXY IS SEPARATED FROM THE “ORIGINAL CREATOR’S UNIVERSE”!

Here are some terms:

ENERGY BARRIER, ENERGY BEINGS, SPACE-TIME ENERGY BARRIER, NON-ENERGY BEINGS, ABUSIVE PERSECUTORIAL PLANET/WORLD, AMNESIA, HYPNOTIC TRANCE, DECEPTION, WHOLE CLOTH LIES, ENTERTAINMENT, SEXUAL ENERGY, PAIN, MISERY, SUFFERING, AI CANNOT BE HELD ACCOUNTABLE FOR CRIMES OR PAY KARMIC DEBT OR GO TO JAIL, DIVINE RESCUE. There is the divine brain which is on the scale of a large atom, it is in the human. This is a level 4 Theomorph. A dog with a soul is a level 3 Theomorph and that is why some dogs radiate “love energy” and some do not. This is why level 2 Theomorphs like flowers and plants give off energy. Morning

Glory Flowers “vine” their way up sticks, wood lattice. If you have a pole beside it, the flower will grow toward it. It you move the pole 180 degrees on the morning glory growth, it will turn-around and go to the new location of the pole so it can wrap itself around it and “climb.” This is proof of “instrumentation” which is by definition: measurement and control. That takes Ai conscience or Divine Consciousness. And i guess level 1 Theomorphs entrapped into minerals like diamonds are a “girl’s best friend.” I don’t need the energy of others, i just need to conserve my energy, which means the least amount of emotional expression which is directly proportional to one’s energy radiation rate, but a thief can plug into your abdomen area and drain you like they have a conductive “tail” and it’s been done 4 times really overtly and unmistakable to me for certain, with and probably more times since waking up around summer 2018 with Chiappalone’s rense show of April 27, 2018. Wish i had heard a previous show with Chiappalone because it wasn’t as discernable as some of the other rense shows he did dating back to the 90’s. Anyways, after all that Ai intentional evil lies about a specific divine rescue and trying to sell it as role-playing when it clearly was not role-playing and was most definitely a form of manipulation, deceipt, time wasting, attempts to cause trauma in a maximum way….LOLOL. Man my brain is way too powerful for them and whoever and whatever the evil is knows it and has been doing devastating destruction on me and i’m still here fighting, and i’m thinking…
